

CHAIN OILERS & APPLICATORS

RDB300 SERIES

The RDB300 Series of manual control chain oilers offers a selection of nine long wearing nylon or stainless steel bristle brushes. The toggle shut-off on the reservoir can be turned on and off without affecting the previously set feed rate. The drip rate is clearly visible through the large viewing window in the mounting shank. Fill cap with side vent minimizes the possibility of dust and dirt entering the reservoir.

There are five sizes of flat brushes available allowing inexpensive brush replacement at a fraction of former cost. Flat brushes can be set at bias to adapt to width needed or be trimmed to suit individual preferences.

Standard Materials:

- Aluminum construction
- Buna N seals
- Break resistant, colorless transparent polymer

Standard Features:

- Central mounting shank facilitates mounting to customer supplied bracket
- Easily disassembled for occasional cleaning

NOTE:

- Please refer to Appendix LE-3 on page LE-A3 for Toggle Valve Adjustment Instructions

NOTE: All dimensions are inches [mm]
