

# DIN TYPE RESERVOIRS

## STYLE 3

The Style 3 Series DIN type steel reservoir is constructed with a recessed welded top and front clean-out access. The reservoir has a low profile with mounting feet outward from tank. The reservoir bottom is sloped toward the front clean-out access with drain port exiting from the front of the reservoir. Each reservoir is supplied with a sight gage, filler breather and access cover.

### Standard Features:

- (1) 5 inch GT623 Series sight gage on capacities of less than 100 gallons; (1) 10 inch G1615 Series sight gage on 100 gallon capacities and above
- Riser with filler breather
  - Bayonet Style — 40 micron
- DIN type access cover, gasket and mounting hardware
- SAE O-ring drain with plug
- Recessed top (drip tray)
- Exterior of reservoir prime painted
- Interior of reservoir coated with rust preventative oil

**NOTE**

- Drain plugs need to be sealed and tightened before use
- Sight Gage and Filler Breather shipped loose inside reservoir
- Industry accepted design practice for hydraulic systems limits maximum operating temperature to 180° F (82° C), but materials used for fabrication of the reservoirs are capable of operating between -40° and 250° F (-40° and 121° C)

### CAUTION:

• Reservoirs are not designed for internal positive or negative pressure applications. For these applications, consult the factory.

**NOTE:** All dimensions are inches
